

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A computer readable medium method to perform customized error handling, comprising:
 - analyzing an application program prior to execution;
 - in response to the analyzing of the application program, detecting a sub-sequence of the application program that, when executed, will cause a first error message to be displayed; and
 - prior to execution of the application program, overwriting the sub-sequence of the application program with new instructions that, when executed, will cause a second error message to be displayed.
- 2-9. (Cancelled)
10. (Previously Presented) A method to perform customized error handling, comprising:
 - intercepting a message that has been sent to a display;
 - searching the message;
 - detecting a first error message in the message;
 - retrieving a second error message corresponding to said first error message; and
 - sending said second error message to the display.
11. (Original) The method of claim 10, wherein said retrieving comprises retrieving said second error message using said first error message.
12. (Previously Presented) An article comprising:
 - a storage medium;

said storage medium including stored instructions that, when executed by a processor, result in intercepting a message that has been sent to a display, searching the message, detecting a first error message in the message, retrieving a second error message corresponding to the first error message, and sending the second error message to the display.

13. (Cancelled)

14. (Previously Presented) The article of claim 12, wherein the stored instructions, when executed by a processor, further result in terminating said first error message.

15. (Original) The article of claim 12, wherein the stored instructions, when executed by a processor, further result in retrieving a second error message by searching an error translation table using said first error message, and retrieving said second error message from said error translation table corresponding to said first error message.
